CALU

Facts you can use

Did you know?

At California University of Pennsylvania, students are our first priority. We're here to facilitate learning and encourage discovery.

Not just in the classroom, but through day-to-day experiences. We're here to foster friendships and to create self-confidence. To build the foundation you need for a successful career, based on your individual dreams. As a medium-sized community of 6,690 undergraduate students and 1,516 graduate students, we're small enough to feel like a family, but large enough to offer variety and diversity. We're here to help you become the individual you've always dreamed of being. As a result, our students not only graduate with a diploma—but a degree of character as well.

Quality and affordability

As a member of the Pennsylvania State System of Higher Education, Cal U offers students a private school experience at a public school price. A vast array of grants, loans, scholarships and work-study programs are available from federal, state and university sources. Financial aid is based on a variety of factors, including academic achievement and financial need. Our Financial Aid Office can help you through the process.

Courses that become you

Cal U offers **more than 200 programs of study** in three undergraduate colleges, as well as the School of Graduate Studies and Research. There is an academic program that is perfect for you, and a proven method to help you graduate in four years. Whether you're interested in using robotic technology in the field of engineering, or helping to shape the future as an early childhood educator, you'll find what you're looking for at Cal U.

Small town near a big city

Located on the banks of the Monongahela River just 35 miles from downtown Pittsburgh, Cal U offers students a beautiful, safe learning environment. Our 92-acre lower campus is the focus of academic life, while our 98-acre upper campus features athletic fields and picnic areas as well as student housing.

HOME TO MORE THAN **100** CLUBS AND ORGANIZATIONS Including **18** NCAA Division II Teams

The scenic Pennsylvania countryside is ideal for hiking, biking, rafting, skiing or horseback riding. Big name retail stores are just minutes away—and so are numerous antique shops and specialty stores. The city of Pittsburgh not only offers diverse cultural experiences, major league sporting events and lively restaurants, but also serves as a vital connection to internships and a dynamic business community.

“Picking a college is a huge decision. Before you enroll, you want to know stuff about the school and the classes. You want to feel like you'd fit in—and that you'd actually be preparing for your future. Once you see what Cal U has to offer, you'll feel the same way I do. I can't imagine being anywhere else.”

Professors who care

Our total faculty includes 414 talented educators—308 are full-time (279 of which are tenure-track faculty) and 135 are adjunct. Nearly 78% of them have terminal degrees in their fields. They are Fulbright Scholars, recipients of prestigious grants, presenters at national and international conferences, and acclaimed experts in their fields. But, at the end of the day, their main reason for coming to work is to pursue their passion to teach, to motivate and to inspire students. **With a student/faculty ratio of 19/1**—their hands-on approach will change the way you think about learning.

High-tech facilities

Cal U is growing—with new buildings that enhance your overall experience. Duda Hall and the Eberly Science and Technology building offer high-tech classrooms and a student-friendly environment. Learn volumes at the Manderino Library, including how to access electronic books, and find credible material on the Internet. Enjoy a performance at the new Steele Hall, **one of the finest theater facilities in the state** of Pennsylvania.

Get real

When our core values of **integrity, civility, and responsibility** are coupled with real-world training, we see a big difference in the types of jobs our graduates get.

So nearly all our students gain real-world, hands-on experience in their fields—whether it's through job shadowing, internships or cooperative education.

Welcome home

Cal U's new student housing is among the best in the nation. **Students come from all 50 states and 30 different countries.** Our six co-ed residence halls offer smoke-free housing for 1,496 students on the lower campus. Our garden-style apartment complex on the upper campus accommodates 768 students. **All units feature air conditioning, carpeting, free local telephone service, cable TV and high-speed Internet.** Most students share a bath with only one other person, and never more than three others.

Especially for you

- Honors Program
- Career Advantage Program
- Dual majors
- Study abroad options
- National student exchange
- "7 Habits of Highly Effective People" training—free to all students
